

raytracer::physics
::GradientCalculator

```
graph BT; A["raytracer::physics::H1GradientCalculator"] --> B["raytracer::physics::GradientCalculator"]
```

The diagram illustrates an inheritance relationship between two C++ classes. At the bottom is a gray-shaded box representing the base class, `raytracer::physics::H1GradientCalculator`. A blue arrow points vertically upwards from this box to a white box above it, representing the derived class, `raytracer::physics::GradientCalculator`. Both boxes have a black border and contain their respective class names in two lines.

raytracer::physics
::H1GradientCalculator
